

Front Projection on wheels

Rear Projection, like in CSU Library.

How you would present with a front projection.

How you would present with a rear projection.

It's all about the CHILDREN!

## Touch system

DViT (Digital Vision Touch) technology is the magic behind SMART's proprietary digital touch system. Cameras track contact on the screen and allow you to use your finger as a mouse. You can write in digital ink on the screen, without special tools or any reduction in image quality.

## SMART Pen Tray

Sensors detect when a pen or eraser tool is picked up from the SMART Pen Tray. Buttons on the tray allow you to choose an on-screen keyboard or to right-click.

## Digital ink

Write in digital ink over applications, websites and videos.

## Save function

Capture your work to SMART Board software as a screen shot that you can edit, or save your notes directly into several software applications, including Windows versions of Microsoft PowerPoint, Word, and Excel, or into AutoCAD software.

## Notebook whiteboarding software

Create, organize and save notes, drawings and screen captures. Access thousands of free images and templates, interactive and educational content, advanced drawing tools and many other features from an easy-to-use interface.

## SMART Board tools

Add several other features and more flexibility to your interactive whiteboard session. Type with the On-Screen Keyboard, write over digital video and much more. Features include LinQ software, Start Center, SMART Video Player, SMART Recorder, Floating Tools and Spotlight.

### Height-adjustment handle

The handle can be used to adjust the screen height between 69" (175.3 cm) and 83" (210.8 cm).

### SMART screen

The diffusion screen reduces reflection and glare to deliver a high-contrast, uniform image with a wide viewing angle.

### Projection system

An integrated XGA (1024 x 768) projector with short-throw lens comes installed.

### Control panel

Projector power, input sources and volume can be controlled at the front of the unit.

### Audio system

The integrated audio system includes stereo-amplified speakers controlled from the front of the unit.

### Laptop or videoconferencing shelf

The shelf connects to either side of the cabinet. There are two height options.

### **Storage tray**

A computer and peripherals can be stored on the tray for easy access.

### **Locking casters**

Four large, durable casters make the 2000i easy to reposition and lock in place.

### **Laptop support (optional)**

Connection cables and an X-Port 20 switch (inside the unit) let you control your laptop from the interactive whiteboard. You can switch between your computer and laptop from the control panel.
